

# Footwear You Can Feel Good About

As part of our *kuleana* (responsibility), we are always challenging ourselves to do what's right, and that means leaving the smallest footprint on our environment. We became a Certified B-Corporation® to show our commitment to *Mālama 'Āina* (care for the land), but we certainly won't stop there. Many of our styles are now being made using recycled materials, the first step on the long road to sustainability. Below are a few examples.

**Upcycled Ocean Plastics**  
**Recycled Polyester**  
**French Terry Material Made from Recycled Water Bottles**

 Pages with a "green leaf" icon are styles that are designed or produced with recycled contents.
