

PRIMUS

EFFICIENCY & LONGEVITY All our products are crafted to withstand all types of conditions, ensuring reliability for generations to come. Built with reparability in mind, spare parts are readily available, prolonging the lifespan of each item. We not only prioritize durability but also operational reliability, allowing for quick and efficient cooking while minimizing environmental impact. By conserving fuel and resources, Primus products aim to facilitate outdoor adventures with minimal ecological footprint, reflecting a commitment to sustainability and efficiency. projects via First Climate. Since last year we are also offsetting the emissions from our Powerfuel, making all our fuel carbon offset.

For our emissions 2022 we have supported a project in Istanbul, Turkey developing and constructing facilities converting landfill gases from two landfills into electric energy. The project is Gold Standard certified (GS ID 707).

INNOVATION TEST LAB At Primus' test lab, our dedicated team of engineers operates amidst an array of tools and equipment, creating an ideal environment for designing and testing prototypes under all types of conditions. Each product undergoes rigorous series of performance tests to ensure perfection before moving into production.

We make no compromises, and no details are left to chance. That's why each product must undergo inspection by three pairs of hands during assembly. As a final touch, our skilled assemblers ignite all stoves one final time before reaching your hands. These measures guarantee perfection and years of reliable use for many years of adventures.

MATERIAL We are dedicated to solid craftsmanship and small-scale production, prioritizing durability and sustainability over cost. Our products are crafted from carefully selected materials, ensuring longevity even in the harshest conditions. We opt for materials with extended lifespans, aiming to minimize our environmental footprint. When it comes time to retire a Primus stove, we ensure that its materials can be repurposed or recycled. Our aim is to design products that not only excel in performance but also contribute to a more sustainable future.

INNOVATED IN SWEDEN – Produced in Europe To ensure highest quality we keep our development in-house at our headquarters in Stockholm, Sweden. From design to thorough testing of prototypes until ready for production.

Since 1994, our Tartu factory in Estonia, strategically located near the Baltic, houses 30 skilled assemblers. This proximity ensures rigorous quality control and honors Europe's crafting heritage.

From initial concept to final production, each stage reflects precision and craftsmanship, setting Primus apart as a leader in outdoor cooking equipment.

EXPEDITION SERVICE For more than 130 years our products have been tested and trusted in the harshest of environments. We take great pride in ensuring all our products meet superior quality and that they will, with the proper maintenance, provide years and years of service. That is why we offer the Primus Expedition Service, applicable to any expedition stove (Ulti, OmniLite Ti, OmniFuel and MultiFuel) sold from 2015 onwards. In the unlikely event the stove should fail due to defective materials or construction, we will help the original owner by sending spare parts, repair the stove or replace it – free of charge.

See www.primusequipment.com for a more extensive description and terms and conditions.

DESIGNED IN SWEDEN Step back in time to 1892, to a blacksmith workshop in the heart of Stockholm. Here, visionaries F. W. Lindqvist and J. V. Svenson invented the world's first soot-free kerosene stove. Being the first of its kind, they aptly named it Primus (meaning 'first').

The name became synonymous with reliable stoves, becoming the top choice for adventurers embarking on both initial ascents and demanding expeditions. From pioneering journeys to the South Pole with Roald Amundsen in 1911 to the iconic conquest of Mount Everest by Tenzing Norgay and Edmund Hillary in 1953, Primus stoves have etched their mark in history, fueling humanity's most extreme adventures, a legacy that lives on to this day!

* STOVE GUIDE

CHOOSE STOVE BASED ON YOUR NEEDS Finding the right stove is much like cooking a meal. There are a few things to consider to succeed. Like how far you will travel and by what means, how many people you will cook for, and the weather conditions. We have listed the ultimate checklist to figure out which stove to choose.

WEATHER CONDITIONS Are you someone who ventures out in both summer and winter? Are your outings mostly on calm days, or do you need to be prepared for harsh winds and sub-zero temperatures? To ensure you're equipped for whatever conditions you encounter, we offer different kitchens tailored to these diverse needs, providing you with confidence and security in every situation.

WEIGHT TO CARRY Do you prefer to be as fast and free as the wind? Or at least feel like it. And only need to boil soups or make a quick cup of coffee? Then the obvious choice for you is a stove with minimum weight. But equally important is a clever design that is optimized for taking up minimal space. With hassle-free packing. Is this what you're looking and cooking for? Then our lightweight stoves got your back on the trails, and you won't even feel it.

COOKING AMBITIONS There's a difference between warming and cooking. Preparing a whole meal from scratch demands more tasks than putting something in the microwave. The same is true outdoors. So before you choose a stove it's important to set your ambition. Are there multiple cooking tasks to manage? What is the desired speed of preparation? What cookware and utensils are needed in the process?

NUMBER OF PEOPLE Are you bringing anyone along for your adventure? Maybe even a few? In that case, you should always bring an outdoor stove that allows you to feed all your hungry family members or friends at once. If you for example want to cook pasta for four people you need a stove that makes it possible both in terms of pot size and flexibility. Go big or go home. (If you want to keep everyone happy.)

* NEWS

PRIMUS DRINKWARE The new Primus drinkware range is lightweight, easy to use and durable – built for expeditions and ready for everyday life. With a modular system that lets you mix and match caps and components, it adapts to your activities, from mountain summits to morning commutes. Inspired by classic Scandinavian design, each piece delivers reliable performance with a stylish Primus look.

PRIMUS STOVES Built on 133 years of experience, Primus continues to redefine outdoor cooking.

The new **Primus Torque** is our best backpacking stove yet — designed for explorers who demand power, windproof performance, and packability in a compact setup. Whether you're hiking, trekking, climbing, or go for alpine adventures, the Torque is built to excel when nature puts you to the test. It's power packed light: a compact stove delivering massive performance.

The 2026 Primus stoves are made for flexibility — whether you're cooking next to your campervan or counting grams in the backcountry. The **Moto stove** is your reliable two-burner model with wind protection and Piezo Ignition, designed for easy meals on the road. For fast-paced trips, the **Light Ultra Stove System** offers one of the lightest setups in the world, starting at just 240 g without compromising stability or performance.

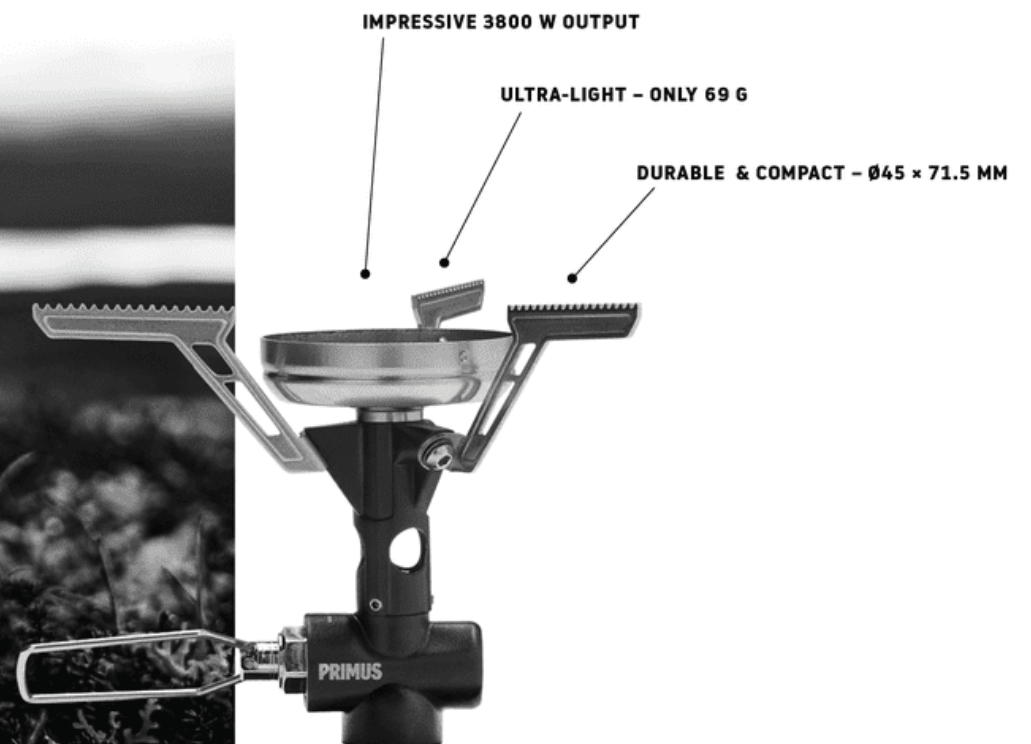

And with updated details like improved pot handles, sleeves, and straps, the refined **Lite Stove Systems** make outdoor cooking even more intuitive — bringing precision, reliability, and a century of innovation to every adventure.

PRIMUS CUTLERY Our updated Trek Cutlery Set and Spork are made from hard-anodised aluminium—lightweight, durable and easy to clean. Designed for reliable use outdoors, they're compact, long-lasting and fit easily in any pack.

ART. NO. P356070

Weight	69 g
Power	3800
Boiling Time	2:45 min with Regular Pot
Serving Group Size	1 - 4 People
Fuel Consumption	296 g/h

Ultra-light (69 g) and top-mounted gas stove with an impressive 3800 W output – combining ultra-low weight and compact design with exceptional power. Perfect for backpacking and fast-paced adventures for 1–2 people.

- Ultra-light top-mounted stove for 1–2 people
- High 3800 W output for fast cooking (TBD)
- Regulator provides steady and consistent performance
- Concentrated, wind-resistant flame with precise simmer control
- Advanced burner design for optimal efficiency and power
- Streamlined, durable construction for reliable performance
- Compact design – dimensions Ø45 × 71.5 mm
- Boils 0.5 L of water in 1 minute and 52 seconds (TBD)
- Weight 69 g (TBD)
- Durable storage pouch included
- Gas not included – use Primus Power Gas, Summer Gas or Winter Gas

MICRON III PIEZO

ART. NO. P321493

Ultralight (73 g) and foldable sit-on-top gas stove with Piezo igniter for 1–2 people—perfect for backpacking and fast-paced adventures.

- Ultra-lightweight backpacking stove for 1–2 people
- Compact, pocket-sized format: 73 g, 62 mm x 46 mm
- Portable, matchstick-style Piezo igniter included
- Foldable pot supports
- Lightweight aluminum valve (no regulator)
- Oversized, foldable control valve handle
- Narrow high-speed flame – wind resistant and efficient
- Output: 2600 W
- Durable nylon storage bag included
- Gas not included – use with Primus Power Gas, Summer Gas or Winter Gas

TOOL FOR KUCHOMA & TUPIKE

ART. NO. P741130

DIN COMBI FOR TUPIKE & KINJIA

ART. NO. P738036

Adapter for connecting LPG bottles with DIN Kombi connection. Fits Kinjia, Tupike & Kuchoma.

HOSE W. ADAPTER P.O.L FOR KUCHOMA (440070)

ART. NO. P741120

EXTENTION HOSE FOR 3501

ART. NO. P741170

M16X1.5 ADAPTOR FOR 3501/4400 (CAMPINGAZ)

ART. NO. P741290

Adapter for connection of LPG bottles with M16x1.5 connection, Eg. CampinGaz R901, R904 & R907. Fits Kinjia, Kuchoma, Tupike, Alika and Moja.

M14X1.5 ADAPTOR FOR 3501/4400 (PRIMUS)

ART. NO. P741300

Adapter for connection of LPG bottles with M14x1.5 connection, e.g. 2012, 2006 & 2000 Fits Kinjia, Kuchoma, Alika, Moja and Tupike.

LINDAL VALVE ADAPTOR FOR 3501,4400,2202,2206,2207

ART. NO. P741310

Adapter for connecting gas containers of EN417 standard with Lindal connection, 7/16 "NS. Fits Kinjia, Kuchoma, Moja, Alika and Tupike.

16.4 OZ ADAPTOR FOR 3501/4400 (PROPANE CANISTERS US)

ART. NO. P741320

Adapter for connection of American 16.4oz Propane bottle. Fits Kinjia, Kuchoma, Alika, Moja and Tupike.

P.O.L ADAPTOR FOR 3501/4400 (P/PA CANISTERS)

ART. NO. P741330

Adapter for connecting LPG bottles with P.O.L connection, e.g. PC5, PC10, P6 and P11. Fits Kinjia, Kuchoma, Alika, Moja and Tupike.

CRIMP POTGRIPPER

ART. NO. P740400

The sturdiness of a fixed handle with the flexibility of a traditional pot gripper.

- Locks safely to the pot making it both easier and safer to cook
- Can be combined with almost any pot
- With one simple push, it releases and can be used for other pots
- Invented in Sweden

ACCESSORIES

POT GRIPPER

ART. NO. P731760

Lightweight Pot Gripper allows you to handle hot pots anywhere with ease.

- Lightweight pot gripper makes it both easier and safer to cook in the outdoors
- Can be combined with almost any pot
- Invented in Sweden

ACCESSORIES

SALT AND PEPPER MILL 2 PACK

ART. NO. P740630

Give your outdoor cooking some extra flavor with these durable salt and pepper mills.

- Set of 2 mills in 2 colors for quick reference
- Made of durable aluminum
- Easy to use with just one hand

CAMPFIRE APRON

ART. NO. P740960

Protect your clothes from grease and soot while cooking at the campsite or in the backyard.

- Made from durable G-1000 fabric
- Two large front pockets keep any cooking accessories within reach
- Single small breast pocket for tasting spoons, pens, or a phone
- Adjustable webbing belt keeps the apron in place
- Stainless steel buckle doubles as a bottle opener

STANDARD CAP WIDE

ART. NO. P745150

Durable plastic lid for all Mika bottles – pour without removing the full cap and carry easily with the TPU strap.

- Wide mouth cap
- Compatible with all Mika bottles
- 70 mm wide opening
- 100% leak proof
- Enables pouring without removing full cap
- Durable plastic construction
- Symmetrical TPU strap for easy carrying
- Strap can be removed or replaced using metal pins
- Dishwasher safe
- Height: 41 mm, diameter: 82 mm
- Weight: 76 g

STRAW CAP WIDE

ART. NO. P745180

Wide plastic cap with strap for Mika bottles – designed for cold drinks and easy sipping on the move.

- Wide straw cap for cold drinks only
- Compatible with all Mika bottles
- 70 mm wide opening
- 100% leak proof
- TPU strap
- Strap can be removed
- Durable plastic construction
- Dishwasher safe
- Height: 48 mm, diameter: 82 mm
- Weight: 79 g

HOT SIP CAP WIDE

ART. NO. P745160

Secure plastic lid for all Mika bottles – made for drinking hot liquids directly from the bottle with a simple twist mechanism.

- Wide lid for drinking hot beverages
- Compatible with all Mika bottles
- 70 mm wide opening
- 100% leak proof
- 90° twist-and click mechanism
- Inner cap can be fully removed
- Asymmetrical TPU strap for easy carrying
- Strap can be removed or replaced using metal pins
- Compatible with all Mika bottles, 70mm wide opening
- Durable plastic construction
- Dishwasher safe
- Height: 56 mm, diameter: 75 mm
- Weight: 93 g

DRINK CAP WIDE

ART. NO. P745170

Plastic cap with strap for all Mika bottles – made for sipping easily while on the move.

- Wide cap with drink spout
- Compatible with all Mika bottles
- 70 mm wide opening
- 100% leak proof
- TPU strap
- Strap can be removed or replaced using metal pins
- Durable plastic construction
- Height: 60 mm, diameter: 82 mm
- Weight: 78 g

STRAW CAP NARROW

ART. NO. P745210

Narrow straw lid with strap for all Tufa bottles – designed for sipping cold drinks during outdoor activities or everyday use.

- Narrow straw lid for cold drinks only
- Compatible with all Tufa bottles
- 44 mm narrow opening
- 100% leak proof
- Asymmetrical TPU strap for easy carrying or attaching
- Strap can be removed or replaced using metal pins
- Durable plastic construction
- Dishwasher safe
- Height: 44 mm, diameter: 58 mm
- Weight: 34 g

SPORT CAP NARROW

ART. NO. P745220

Plastic sports lid with strap for all Tufa bottles – designed for cold drinks and quick hydration on the go.

- Narrow sports lid for cold drinks only
- Compatible with all Tufa bottles
- 44 mm narrow opening
- Spill-proof
- Asymmetrical TPU strap for carrying or attaching
- Strap can be removed or replaced using metal pins
- Durable plastic construction
- Dishwasher safe
- Height: 60 mm, diameter: 58 mm
- Weight: 36 g

FUEL BOTTLE GREEN 1.0L

ART. NO. P721967

Primus

[primus] noun
from Latin *primus* meaning "[the] first"
(see also: reliable, easy-to-use, powerful, portable)

PRIMUS

Primus was the stove accompanying:
Fridtjof Nansen's North Pole attempt in 1893,
The Andr e Expeditions North Pole attempt in 1897,
Roald Amundsen's South Pole expedition in 1911,
Richard Byrd's North Pole expedition in 1926,
George Mallory's ill-fated expedition to Mount Everest in 1924,
as well as Tenzing and Hillary's successful one in 1953.
IMPOSSIBLE MEALS MADE POSSIBLE SINCE 1892

SIP POWER GAS 230G EMPTY

ART. NO. P566410

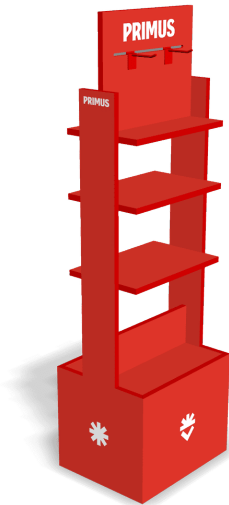

The SIP Power Gas is our most sustainable gas with reduced CO2 footprint. For every SIP Power Canister, we purchase biogas made from food waste instead of fossil-based fuel. All components, from the steel of the canister to the fuel, are sourced in Europe. The SIP Power Gas is a true allround gas that performs in the majority of outdoor cooking solutions.
